Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)
	09/845,791	TINIANOV, BRANDON DILLAN
	Examiner Renata McCloud	Art Unit 2837

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 01 June 2004.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1,2 and 4-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1,2 and 4-8 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

1. In response to the amendment filed 01 June 2004, the following has occurred:

The 35 USC 112 rejection has been withdrawn by the examiner.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1,2, and 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haines et al (U.S. Patent 5,824,973), in view of Kraft et al (U.S. Patent 6,182,787).

Claim 1: Haines et al teach a system for improved sound absorption with a substrate (14) of porous material and of a first air flow resistance (214/216/ 218); and a facing (16) material attached to the substrate and of a second air flow resistance (214/216/218), a total system resistance is a combination of the first and second air flow resistances, the second air flow resistance is a relatively low values (See. Fig.1, Fig. 5, and Column 8, lines 25-44). However Haines et al do not teach the total system airflow resistance is around between 900 to 1300 MKS Rayls.

Kraft et al teach an acoustic treatment core having an airflow of around between 900 and 1300 MKS Rayls (e.g. Col. 4: 45-65 teaches a resistance of 20 to 120 CGS Rayls which is equal to 200 to 1200 MKS Rayls). It would have been obvious to one

having ordinary skill in the art at the time the invention was made to modify replace the sound absorbing laminate core taught by Haines et al with the core taught by Kraft et al. The advantage of this would be a total system airflow resistance within 900 to 1300 MKS Rayls, due to the core having a higher airflow resistance.

Claim 2: Haines et al and Kraft et al teach the limitations of claim 1.

Referring to claim 2, Kraft et al teach the facing material (e.g. Fig. 3:102) has an airflow resistance of 360 MKS Rayls (e.g. Col. 4: 45-65).

Claim 4 Haines et al and Kraft et al teach the limitations of claim 1.

Referring to claim 4, Haines et al teach the substrate is made of glass fiber, mineral wool, thermoplastic polymer fiber, thermosetting polymeric fiber, carbonaceous fiber, milkweed fiber, and foam insulation (e.g. Column 8:15-25).

Claim 5: Haines et al and Kraft et al teach the limitations of claim 1.

Referring to claim 5, Haines et al teach the substrate can be a ceiling tile (e.g. Column 1:22-29).

Claim 6: Haines et al and Kraft et al teach the limitations of claim 1.

Referring to claim 6, Haines et al teach a second facing material attached to the substrate (e.g. Column 3:8-14; Fig. 1).

Claim 7: Haines et al and Kraft et al teach the limitations of claim 1.

Referring to claim 7, Haines et al teach the facing material and the second facing material form two opposite exterior surfaces of the system (e.g. Fig. 1, #16, #14).

Claim 8: Haines et al and Kraft et al teach the limitations of claim 1.

Referring to claim 8, Haines et al teach a second airflow resistance of around 100 to 642 mks Rayls (Col. 7:24-28).

Response to Arguments

4. Applicant's arguments filed 01 June 2004 have been fully considered but they are not persuasive. In response to applicant's argument that Kraft et al do not teach a total system resistance between 900-1300 mks Rayls, applicant's arguments do not reflect the examiner's rejection. The examiner is not stating that the Kraft et al teach a total system airflow resistance between 900-1300 mks rayls. The examiner is referring to modifying the sound absorbing laminate core taught by Haines et al with the core taught by Kraft et al. Since the total system air flow resistance is the combination of the first and second resistances, if one were to replace the core taught by Haines et al with a core having a higher resistance, such as that taught by Kraft et al, the total system resistance would be around 900-1300 mks rayls.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2837

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Renata McCloud whose telephone number is (571) 272-2069. The examiner can normally be reached on Mon.- Fri. from 8 am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on (571) 272-2800 ext. 4. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
